# i-clarity

# Azure Hosting; 2025 Price and Benefits

## The price for hosting your i-clarity database on Microsoft Azure £80+VAT per month.

The benefits of an i-clarity Microsoft Azure server included:

• Database with patient data is not physically in the practice.

• Price includes backup or hosting of associated i-clarity documents up to 50GB.

• Data is backed up automatically every day, with snapshots of the database from intervals throughout the day.

• Access to i-clarity from outside the practice without the need for port forwarding or 3rd party VPN software.

• Server is configured to allow for online modules to be used without the need for changes to your practice network e.g. online appointment booking.

• Monitoring of machine performance to ensure optimum i-clarity performance.

• Server is updated weekly outside of office hours (between1am to 4am).

• Operating software of server is always supported by Microsoft, no need to outlay for new machines when operating software support is discontinued.

• Server is configured to encrypt data as it moves from the server to the workstations.

• i-Clarity server program updates to be completed by i-clarity when new versions of the system are released.
